Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no 5,803,437 to Paterson et al.

Paterson discloses a winch assembly comprising: a chassis 12; an electric motor 14 mounted to the chassis; a threaded rod 54 rotationally coupled with the electric motor, a winch spool 18, the winch spool being adapted to receive a cable 16 therearound; a trigger mechanism (60, 62), the trigger mechanism being (i) threadably engaged with the threaded rod 54 and (ii) adapted for linear movement along the threaded rod upon rotation of the threaded rod; and at least one limit switch 64, the at least one limit switch being (i) electrically coupled to the electric motor, and (ii) mounted on the chassis generally proximate the threaded rod for activation by the trigger mechanism; wherein activation of the at least one limit switch by the trigger mechanism deactivates the electric motor and stops the rotational motion of the threaded rod and the winch spool.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent no. 4,261,614 to Rice in view of Paterson et al.

Rice discloses a manually telescoping camper but does disclose a winch as set forth in claim 1.

Paterson discloses the elements of claim 1. It would have been obvious to one of ordinary skill in the art to provide Rice with a winch as taught by Paterson so that the lifting of the telescoping portion 17 maybe extended and lowered automatically and electronically without tiring the user.

Conclusion

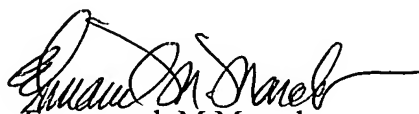

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
